## Rolleimarin Tripod

"Golden Edition" of the tripod for the Hans Hass Rolleimarin Underwater housing. A lightweight and very sturdy aluminium tripod, gold colour anodised, for displaying your precious Rolleimarin housing in exhibitions or in your own private museum. It has been copied from the original design by Franke & Heidecke which was only ever manufactured in small numbers for their own use. It is not specially designed to use underwater, but it's possible. It can be dismantled for transport and will also be delivered in this version. The tripod is attached to the bottom of the Rolleimarin using the grooves on the bottom and is secured by an eccentric lever similar to the way the flash arm is mounted on the side of the housing - Your "old lady" will look much better on a tripod now, she deserves it.

Price: Euro 158.00 + shipping

## Rollei 10 Volt battery refurbished with NiMH-cells and intelligent quick charger with automatic switch-off

New combination: Rollei 10 volt battery, equipped with NiMH cells and an automatic fast charger unit 115-230 VAC. This newly developed charger replaces the previous Rollei chargers, type M, G, N and C etc, designed for the old NiCd-batteries used in the Rolleiflex SLX and 6000 camera series. The entire combination weighs only 320 grams, it is small and light, the black plastic injection moulding is stable, a professional design with the best workmanship and gold contacts.

The charger unit itself can be delivered as a complete unit (version 1 = charging cup and attached wall plug charger combined) or as a two part unit, (version 2 = charging box and wall charger separate units). Furthermore, a European and a US version are available, as well as a car charger with plug for the cigarette lighter-12vdc. A German and English manual is enclosed with the package. Adapters for different countries are included. CE certified and 1 year manufacturer's warranty.

Price: Euro 265.00 + shipping
